- Min investment: 0.1 ETH
- Max investment: 10 ETH
- Soft Cap: 333 ETH
- Hard Cap: 999 ETH
- Listing on Uniswap 28th Feb 2021

Public Sale

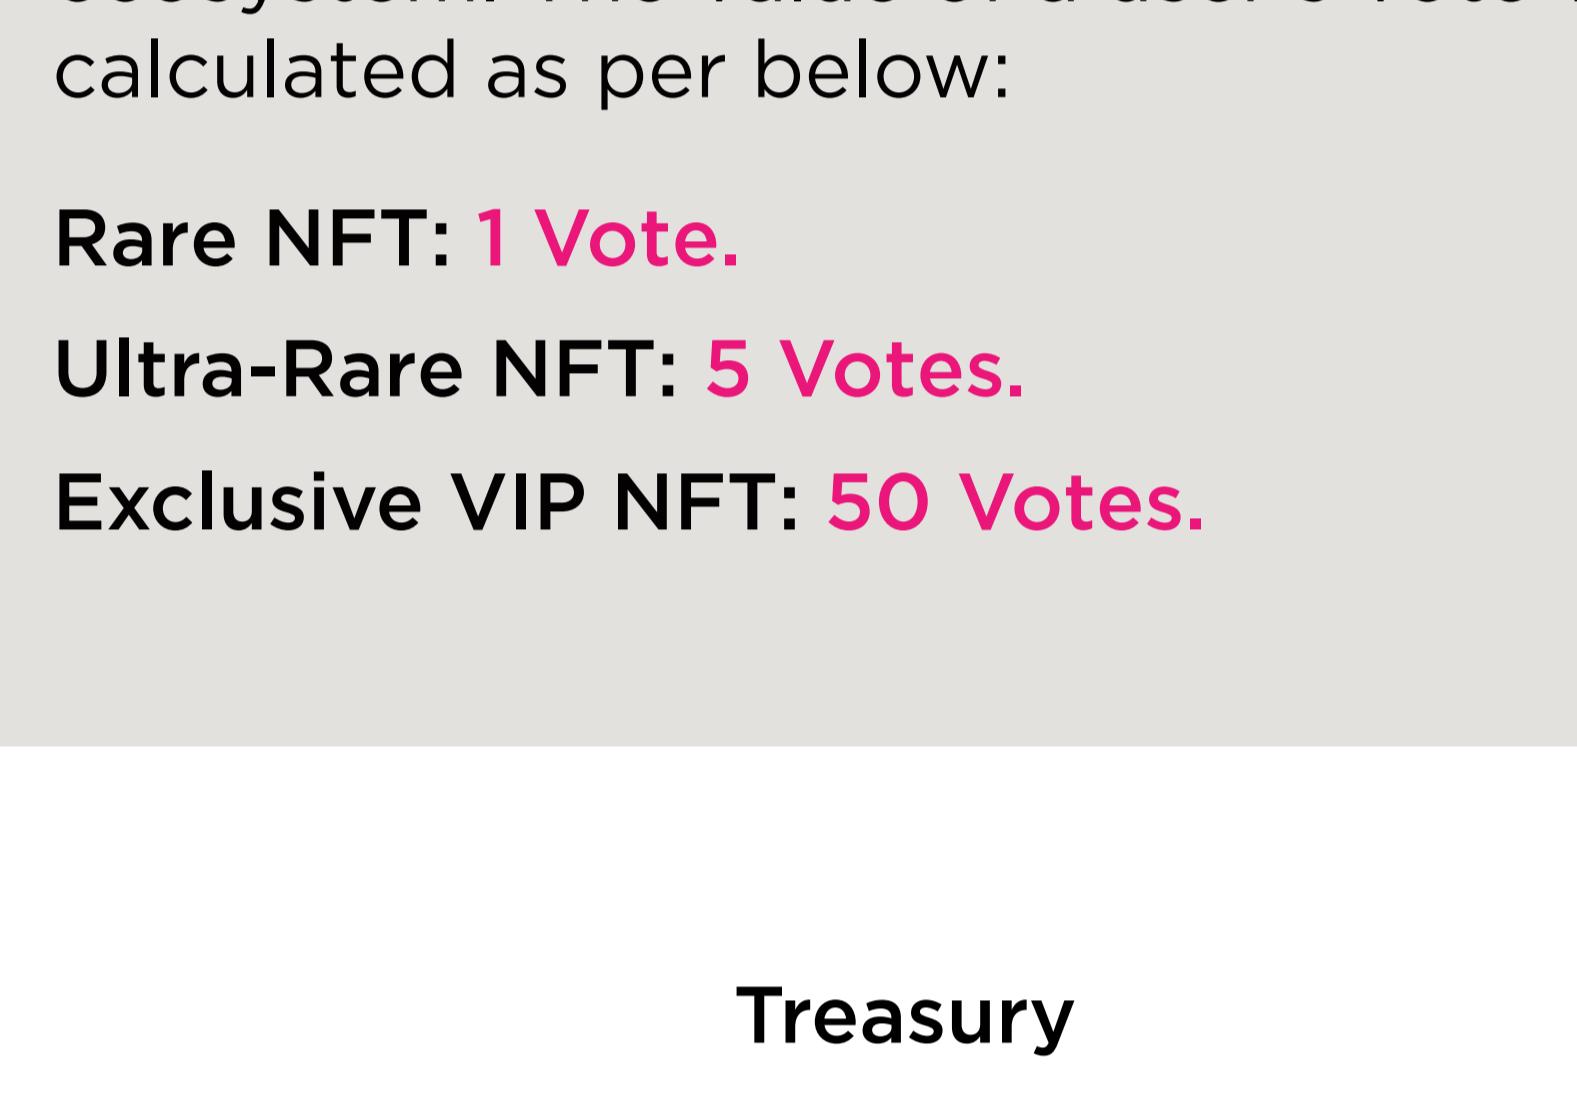

Uniswap Listing

The Aloha WiFi team has a vision to connect to the DeFi world.

This will be achieved over a period of time and our current App which is **currently a working platform** will transition into a DApp in the near future.

Aloha will have a public sale based on its DeFi token which will be used for various solutions **both in the real world and in the DeFi community.**

ALOHA DEFI:

Aloha DeFi has built a platform where users can stake their Aloha and earn a rare NFT in exchange. The NFT will have different rarities depending on how much Aloha the users stake, it will also have features such as governance, partnership, pools, exclusivity and more will be introduced throughout.

NFT GOVERNANCE:

The Aloha NFT will be used in governance and presents an exciting opportunity for both investors and the community. Aloha users will be able to make proposals via the Governance system and determine Aloha's future ecosystem. The value of a user's vote will be calculated as per below:

Rare NFT: 1 Vote.

Ultra-Rare NFT: 5 Votes.

Exclusive VIP NFT: 50 Votes.

ALOHA NFT STAKING:

In order to have an Aloha NFT, users will have to stake their Aloha via our platform for a period of time and claim the NFT once the staking time period has been completed. The rarity of the NFT will depend on the amount of Aloha staked. To begin with there will be three pools:

1. RARE:
Stake 10,000 ALOHA for 10 days to receive your Rare NFT.

2. ULTRA-RARE:
Stake 90,000 ALOHA for 14 days to receive your Ultra - Rare NFT.

3. EXCLUSIVE VIP:
Stake 200,000 ALOHA for 21 days to receive your Exclusive VIP NFT.

ALOHA TREASURY:

For each transaction of Aloha there will be a 3% fee of which will be distributed accordingly into the factors below:

Treasury: 70% of the 3% fee.

Marketing, Development & Operations: 20% of the 3% fee.

NFT Holders: 10% of the 3% fee.

This will ensure a healthy ecosystem, as well as incentivizing NFT holders. The use of the treasury funds will be decided by the community via proposals in the Governance platform.

After the agreed time period, you will be able to claim your NFT to your wallet. If you un-stake before the time period, you will not be eligible for the NFT however you will still have 100% of your Aloha returned back to your wallet.

Once the NFT has been claimed, the user will be able to un-stake the Aloha and re-stake to earn another NFT. If the NFT is in the same category/pool then they will earn the same rarity of the NFT, however a different design.

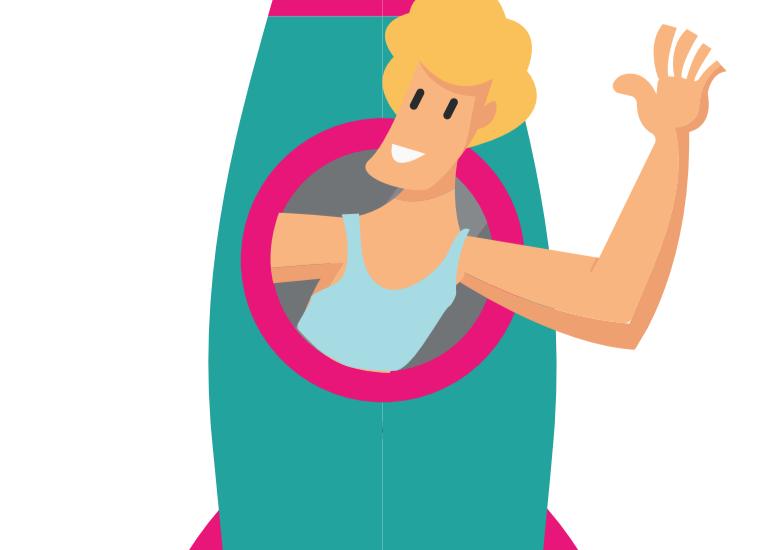

PARTNERSHIP POOLS:

Users will be able to stake ALOHA/XYZ to receive a limited edition NFT with the partnered project.

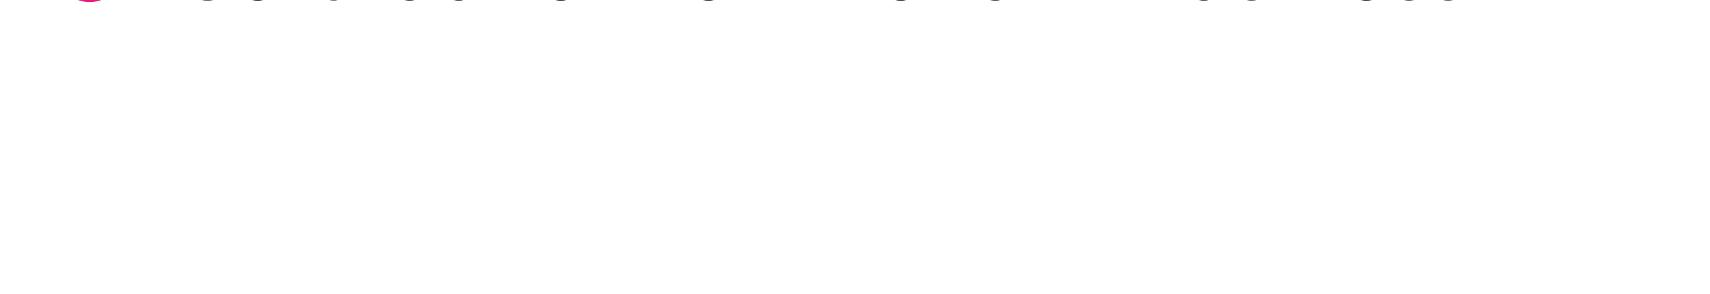

Q1

- Complete Public Sale
- List on Uniswap
- Launch NFT Staking Platform
- Continue WiFi App Developments
- Build community.
- Implement Governance System
- Expand Marketing Campaign
- Add partnership pools.

Q2

- Stake NFTs to earn Aloha
- Explore Tier 1 CEX Exchanges
- Build on-top of the current ALOHA Ecosystem
- Begin Micro DEX Development for Aloha App
- Provide more pools, limited edition NFTs and expand staking opportunities.
- Test Aloha for Business

Q3

- Bridge Aloha WiFi App with Aloha DeFi
- Integrate Micro Dex for users to swap Aloha Bucks for Aloha Tokens
- Listing on Tier 1 CEX
- Generate revenue via the DApp
- Explore Corporate Partnerships
- Soft launch for Aloha 4 Business

Q4

- Expand Aloha b2c/B2B across the UK
- Develop an extensive DEX with optimized features, integrated with the Aloha Ecosystem
